As the discourse around the potential and growth of AI continues to intensify, it is important for stakeholders within the AI ecosystem, like Visa, to actively participate in these critical conversations. By engaging in these discussions, we aim to navigate the complexities of this evolving topic, identify opportunities, and collectively shape the future of AI with ecosystem partners. It is this commitment that led us to participate in the recent SuperAI conference.

Had a great time at the SuperAI event last week!

Enjoyed a brilliant session by Marc Raibert, founder of Boston Dynamics and an engaging fireside conversation with Edward Snowden (live from Russia).

My positive takeaway was Max Tegmark's perspective: "AI will not make us obsolete, but it will make us superhuman."
